

LSR 35 // Ventilation controller

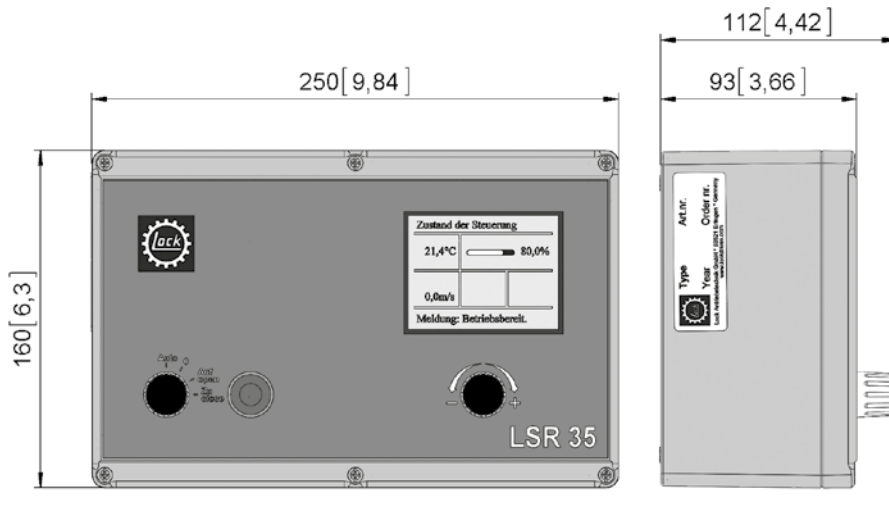

- Temperature-dependent ventilation controller
- Complies with all current safety standards. PL=C in conjunction with emergency stop switch (accessories).
- Scope for connection of a wind and a rain sensor.
- One temperature for a 230 V 1~ drive unit can be connected to directly.
- Simple to operate using a big color display.
- Independent runtime recording, minimum opening and maximum opening of side A and B possible.
- Desired temperature value adjustable from -20°C to +60°C.
- Cycle times, wait times and hysteresis are adjustable.
- Plastic housing incl. temperature sensor.
- 'Vibrate' function protects the unit against freezing in sub-zero conditions.
- Override of manual cycling action is possible.
- Integrated counter for operating hours.

Options:

- Windspeed sensor WST 15 (page 4).
- Rain sensor RST 65 (page 5).

Tip:

- Advice from our climate experts.
